Professional Summary

Computer Science undergraduate specializing in Autonomous Vehicles with strong proficiency in Java and Object-Oriented Programming. Experienced in developing backend and full-stack applications using Spring Boot, React.js, Node.js, MySQL, and MongoDB. Hands-on experience in cloud technologies, CI/CD automation, and application deployment using AWS, Docker, and Jenkins. Developed innovative projects in Advanced Driver Assistance Systems (ADAS), including Lane Change Assist using Blind Spot Monitoring and Automatic Emergency Braking with Raspberry Pi and Computer Vision. AWS Certified Developer Associate and Microsoft Azure Fundamentals certified, with a strong interest in software engineering, intelligent transportation systems, cloud computing, and emerging technologies.

Technical Skills

Programming Languages	C++, Java, Python, C, SQL
Backend	Spring Boot, Spring MVC, Hibernate, JPA, Node.js, REST APIs
Frontend	React.js, HTML5, CSS3, Responsive Web Design
Databases	MySQL, MongoDB, JDBC, Database Design
Cloud & DevOps	AWS (EC2, Aurora RDS), Microsoft Azure, Docker, Kubernetes, Jenkins, Git, GitHub, CI/CD Pipelines
Machine Learning	Convolutional Neural Networks (CNN), Computer Vision, Machine Learning

Technical Projects

Lane Change Assist System using Blind Spot Monitoring (BSM) and Automatic Emergency Braking (AEB) *GitHub • Raspberry Pi, Python, OpenCV, Computer Vision*

- Developed a vehicle safety system using Raspberry Pi, ultrasonic sensors, and computer vision.
- Implemented Blind Spot Monitoring to detect obstacles on the left and right sides of the vehicle.
- Built an Automatic Emergency Braking system that stops the vehicle when an obstacle is detected nearby.
- Integrated sensors and motor controls to simulate safe lane changing and collision avoidance.
- Displayed obstacle warnings through LEDs and buzzer alerts for driver assistance.
- Tested the prototype under different obstacle distances to improve detection accuracy.

Microservices E-Commerce Platform with CI/CD Automation *GitHub • Spring Boot, React.js, Docker, Jenkins, AWS, MySQL*

- Developed an e-commerce application for managing products, users, and orders.
- Built REST APIs using Spring Boot and connected them to a MySQL database.
- Used Docker for application containerization and Jenkins for automated deployment.
- Deployed the application on AWS EC2 and tested API functionality.
- Implemented CRUD operations for product and customer management.
- Designed a responsive user interface using React.js for improved user experience.

Full Stack MERN E-Commerce Application *GitHub • MongoDB, Express.js, React.js, Node.js*

- Developed a full-stack e-commerce website using MongoDB, Express.js, React.js, and Node.js.
- Created user authentication and login functionality using JWT.
- Built features such as product listing, shopping cart, and order management.
- Designed REST APIs to handle communication between the frontend and backend.
- Implemented CRUD operations for managing products and user information.
- Integrated MongoDB for efficient storage and retrieval of application data.

Education

KL University

Bachelor of Technology in Computer Science and Engineering | CGPA: 9.78/10.0

*Expected July 2027
Guntur, Andhra Pradesh*

Jhanatha Junior College

Maharashtra State Board | Percentage: 61%

*2021 – 2023
Nagpur, Maharashtra*

Jain Heritage A Cambridge School

CBSE | Percentage: 73%

*2020 – 2021
Nagpur, Maharashtra*

Certifications

- **AWS Certified Developer Associate (DVA-C02)**
- **MongoDB Associate Developer**
- **Microsoft Certified: Azure Fundamentals (AZ-900)**

*Amazon Web Services
MongoDB University
Microsoft Azure*
